University College Hospitals London NHS Trust

Apr 2016

Honorary Associate Professor

University College London

Career Aims:

Short term: I work in a tertiary referral center and have a high volume practice in hip and knee surgery and trauma. I undertake hip and knee arthroplasty, complex revisions as well as hip and knee arthroscopy and sports reconstructions. I collaborate with several UCL researchers and I am working towards building a translational team to research into musculoskeletal disorders, joint arthroplasty and sports injuries as well as innovations in surgical practices.

Long term: My long-term goal is to become a REF returnable consultant surgeon in Trauma and Orthopaedics and contribute towards continued education, research and innovation.

Hobbies

I am a strong believer in physical fitness and don't miss any opportunity to pursue fitness activities. I used to have keen interest in football and volleyball. I have represented my school and college in these sports. In my leisure time I like painting and travelling. I also enjoy spending quality time with my family.
